

INSTALLATION INSTRUCTIONS FOR BELTRONICS AND ESCORT RADAR DETECTORS AND THE MURAKAMI MANUAL DIM REAR VIEW MIRROR

This mount was designed for the Murakami manual dim rear view mirror. It is easy to identify as it has a “chili pepper” shaped stem. This mirror is found in many Japanese vehicles.

1 - Install your radar detector (RD) onto the mount before attaching to the rear view mirror. To release tension from the spring clip, simply squeeze the tab and the back side of the mount together. This will lower the bottom portion of the spring clip allowing you to slide the RD on and off the mount.

2 - Push the RD Release button and slide the RD onto the Spring Clip until the RD hits the bottom of the Tab. Then release both the Tab and the Button. Now slide the RD toward you until you hear it lock into position. Remove the RD a few times so you can observe how the spring clip functions. When used properly, the spring clip avoids putting excessive pressure on the mirror stem when installing and removing the RD.

3 - Remove the two socket head screws so the top portion of the mount may be removed. Position the mount on the bottom of the stem as shown above. The edge of the mount needs to be where the tapered part of the stem gets smaller. Reattach the top portion of the mount. Tighten both screws evenly and just before the mount starts to clamp onto the stem, make sure it is in the correct position as indicated by the red arrows. Proceed to tighten both screws until mount is securely attached to the mirror stem.

4 - Install the RD onto the mount. Make the necessary adjustments as shown below. We recommend you adjust the RD so it is as close to the bottom of the mirror as possible. Using the vertical adjustment, adjust upward as far as possible while making sure the mirror dimming switch is still accessible. After all adjustments are made, be sure to check that the hinge pivot and vertical adjustment screws are tight. Grab the long arm of the allen wrench to assure that these screws are securely tightened.

5 - This mount can get extremely hot when setting in the direct sunlight, especially with the windows rolled up. If you intend to remove your RD frequently, we strongly recommend that you install the 3/32" thick touch strips which will not get as hot as the metal of the mount will. Place these strips where your two fingers make contact with the mount. They may be trimmed with a blade or knife.

BLENDMOUNT ADJUSTMENTS

With multiple adjustments available, you should be able to position your RD right where you want it. If you are unable to achieve this, be sure to contact us at 1-707-664-8234

CAUTION

DO NOT use this mount if it interferes with the adjustability or the operation of your rear view mirror in any way. **DO NOT** use this mount if the radar detector creates an unsafe viewing obstruction.

DO NOT ATTEMPT TO MODIFY THIS PRODUCT. Consult the manufacturer for assistance.
